Healing Touch can gently but significantly impact your life.
What can you expect?
Healing Touch facilitates a deep sense of calm and relaxation as well as overall and specific responses for body-mind-spirit healing. You may feel nurtured and energized.

A Healing Touch session can be given anywhere, from a chair in a client’s home to the bed in a hospital room.

The session is typically administered while the client lies on a treatment table or bed with clothes on. The practitioner uses her/his hands to assess your energy system. She proceeds to clear and balance it as needed using either off body touch (near body but no direct contact) or a gentle (still) touch on various areas of the body.

An average session may last anywhere from 15 to 60 minutes, based on the client’s needs and the methods being used.

How does energy healing work?
Energy therapies focus on removing energy congestion that forms in our energy fields (aura) and energy centers (chakras). It re-establishes healthy energy flow through opening, connecting and balancing the human energy system.

Healing Touch was founded by Janet Mentgen, RN in 1989 and is now an international program taught in a variety of settings.

Healing Touch Program is endorsed by the American Holistic Nurses Association (AHNA) and the Canadian Holistic Nurses Association (CHNA).

What is Healing Touch?
Healing Touch is a compassionate energy therapy in which practitioners use their hands in a heart-centered and intentional way to support and facilitate your physical, emotional, mental and spiritual health and self-healing.

Healing Touch uses gentle, light or near-body touch to clear, balance, energize and support the human energy system in an effort to promote healing for the whole person: mind, body, spirit.

Healing Touch is a complementary, integrative energy therapy that can be used in conjunction with traditional therapies.

The goal of Healing Touch is to restore harmony and balance in the human energy system thus creating an optimal environment for the body’s innate tendency for healing to occur.
