The Light that Bridges the Gap: Crossing Through the Dark to Wield the Light

The difference between our human and divine awareness can leave us feeling confused and ill-at-ease and sometimes unable to clear the blocks that are preventing us from showing up fully in our own lives and for our clients.

Try as we might, it can be hard to zero in on what gets in our way in terms of the use and effectiveness of our abilities as healers. We KNOW the light is there. It IS more powerful than the dark. How do we best understand, and even more importantly, grasp our own inner light, as well as the central light of the world, so it works for good and highest outcome?

By not utilizing the availability of light inhibits our effectiveness with clients and prevents us from activating our full spiritual powers, which could be used to make our own lives more dynamic and also, maybe literally, enlighten the world.

In this presentation you will explore the conceptual understanding of cosmology necessary to understand why the world seems so dark and why it's hard to totally grasp and use our gifts. Learn specific techniques that clear the resistance (our own and others) and make completely available this light or power of goodness.

In this presentation discover:

- The ***Nature of Light*** both scientifically and spiritually so that you can utilize the *Light* to shift the universe, society, our clients' lives, and our own personal lives, from negative and destructive to positive and illuminating.
- Explore theories of the macro (universal) and also micro (molecular) levels of existence and the "gaps" between the heavenly and the "fallen" to better understand why healers are so uniquely positioned to part the veils and bring through the energies already available to forge changes so necessary during this time.
- The use of spiritual qualities, which Cyndi calls ***Healing Streams of Grace***, to access the

true powers available to all so you can be fully empowered in your personal and professional lives; as healers; and operate as a point of change within the world. Always available, these streams can do anything, anywhere, and “anytime.”

- The frequency-altering music of Dr. Michael Scroggins and John Inmon so that you can experience the personal and transformative shift of “filling the gap” or closing the holes between the heavenly and “fallen” states.
- Experience a guided meditation for parting the veils and transforming darkness into light so that you can more fully active your divine gifts of light.

Be ready to grasp the truth of your divine power and through understanding the reasons that this world feels so dark, reach through any and all personal and earthly barriers to unlock and wield the light available for good.

Plan to stay Sunday afternoon for Cyndi Dale’s 3-hour Master Class on Sunday afternoon *Miracles: Yours to Receive, Yours to Deliver*. See the post conference page for the Master Class description.

Living in Flow: The Science of Synchronicity and How Your Choices Shape Your World

If you’re like most people, you’ve had a meaningful synchronistic experience at some point in your life. You may have been randomly thinking about a friend, and out of the blue, you get a phone call from that person. Most brush this off as pure chance, but physicist Sky Nelson-Isaacs is researching the science behind this phenomena.

Referring to a cutting-edge scientific theory of synchronicity, Sky Nelson-Isaacs presents a model for living “*in the flow*”—whether at home or at work—which allows for a more flexible relationship with daily experiences and can bring harmony and fulfillment into your life by aligning with circumstance.

Synchronicity is a powerful tool for healing and growth, if you know how to spot the meaningful circumstances that act as practical guideposts through the healing process. By becoming aware of nature’s responses in the form of synchronicity, we can be guided to uncover hidden feelings, which can then be healed through a renewed ability to choose consciously, revealing our authentic nature.

In this presentation discover:

- The **LORRAX process** so you can get into **flow**, discover and connect clues in daily life (your own or your client’s) to facilitate healing and growth.
- The power of our own choices to determine an **effective solution to a client’s illness**. See how proper treatment emerges naturally and is partly determined by the very choices the practitioner makes. “Right” is determined by both the practitioner and the client working together in flow.
- Why obstacles and surprises can serve as sources of useful information.
- A meditative practice to recognize the unnoticed opportunities for change in the practitioner’s life or client’s life.

Aligning with circumstances by **getting into flow** is the natural way to meet the needs of all components of a system, whether that is within the human body, between people, or in the wider community.

One Heart at a Time: How Music Can Heal Yourself and the World

Each of us has a unique and special gift to give to the world but sometimes the responsibilities of our lives get in our way and it's just overwhelming. ***But we all know the truth: we can't really help or heal anyone else until we have taken care of ourselves.*** So how do we do that – how can we heal ourselves and also have enough left over to give to our clients and the world?

One-way is to notice how you start your day: the thoughts and feelings you have set the foundation for how your day will unfold, and using positive messages coupled with music is a great way to start!

In this musical presentation you will discover how using music, humor, and spiritual practices can set you up in a positive tone so that the gift you give to the world is from your authentic self.

Singer-songwriter-speaker Karen Drucker will share songs and stories about how you can use the healing power of music to uplift and inspire ourselves and also our Healing Touch clients. When a piece of music or lyrics to a song go right to the heart of what your client needs to hear, it can facilitate you as a healing touch practitioner to give them a total healing experience...and that is how we heal the world – one heart at a time!

WARNING: singing, laughing, maybe some tears, and connection will be part of this experience!

**Mutual Vulnerability and
Community Building:
Enhancing the Way You
Practice by Accessing Your
Personal Stories**

Many of us in the helping professions work on improving our skills by working on becoming more adept and understanding what the client needs that we can provide. We often approach this deeper understanding by asking the client to tell us their symptoms and the stories they are carrying that may be impacting their wellbeing. In other words, we find ways to help our clients be more vulnerable and transparent so that we can comfort, heal and fortify them.

In order to effect change in our world: among our clients, staff, and community members, we must have a working familiarity with our own lives. What are your personal stories? Developing ways to better serve our clients starts with knowing our individual stories so that we are not surprised by reactions or ways that we were triggered because we did not know where our own trip wires were set.

In this interactive presentation:

- You'll explore your own personal plot so that you can use it as a tool to tap into your internal wellspring source so that you can intentionally manifest your gifts wherever you go, and with whomever you work.
- You'll gain insight on how to build individualized solutions to challenges as opposed to attempting solution based solely on the expectations of roles and professional titles.

Empowering Extra Events

Awesome workshops, one sound healing presentation and one amazing concert have been added to this year's conference - all included in your registration fee.

Zelda Lockhart

**Workshop - Hopes & Fears:
Capitalize on Your Gifts in the
Client/Practitioner
Relationship**

- We'll explore the source of your wounds and gifts related to your hopes and fears so that you can intentionally capitalize on your gifts when helping your clients, and manage any triggers related to your wounds when working with your clients.
- Discover how to make parallels between your personal and professional frustrations and successes through the plots of your own stories.
- You'll gain insight and tools so that you can build individualized solutions to challenges as opposed to attempting solution based solely on the expectations of roles and professional titles which can be modified to be utilized in their healing practice.
- Through these writing activities you'll gain long-term professional growth and a means by which manage persistent professional obstacles.

Workshop - The Relationship Museum: Building Community Through the Mutual Vulnerability of Shared Stories

- Discover a new way of looking at what you cherish in this physical world and why.
- We'll explore tools on sharing your stories in an indigenous storytelling fashion where the words of one inspire the experiences of another.
- Understand and encourage Object Relations Work with your clients in your healing practice so that you can create a deeper connection with them.

Dr. Lockhart utilizes humor and the irony of our dichotomies as the opportunity to laugh about our shared human dilemmas to gain a better understanding of our ability to engage in transformative work in the lives of others by engaging in transformative work in your own life utilizing your personal plot as the tool.

Presentation - Sound Healing Gong Immersion: The Gateway to Heightened States of Awareness and Consciousness

Virtually everything on Earth vibrates. Quantum physics has shown that everything in the physical world of our five senses is made up of vibrating energy. Sound vibrations have a tremendous influence over our emotional bodies as well as our physical bodies.

Join us in the presentation where we discover the power and influence that sound has in our lives and how it can be used in your Healing Touch sessions to facilitate or enhance the relaxation response and other healing responses of body-mind-spirit that can occur during session.

During this special presentation you will discover:

- How sound healing affects the body-mind-spirit, through both a scientific, intellectual approach and through direct experience.
- Explore the concepts of sound healing to the chakra system, body organs, the V-Element theory in Chinese medicine, to the relaxation response, brain waves and other physical, emotional, mental and spiritual responses.
- Experience a the transformation power of a 50 minute **Gong Immersion**, which generates powerful multi-dimensional ripples of sound that grow into waves and bathe your entire body in streams of sound so that you can be in the state of total body/mind harmony.

BRING: blankets, pillows, or eye covers to enhance your relaxation response!

Gift yourself time to receive, relax and let go.

Sacred Singing Event after dinner on Saturday Evening

"Music has the ability to bypass the mind and sink into the heart."

Breathing, stillness, rest, calm, allowing yourself to just "be" and not "do" for a little while. Settling into your heart and dropping into that place of inner knowing. With all that is going on in the world right now, give yourself a "time out" and allow yourself to be musically and spiritually nurtured.

Saturday night will be an audience participatory event where we will sing and chant, and do short meditations together. We create this sacred space by spending time chanting, (singing repetitive and affirmative words over and over), being in silence, listening to short inspirational readings, and just allowing ourselves to "be".

Come with an open heart and a willingness to receive.

6 Ways to Deepen Your Learning

Attend a post-conference intensive and deepen your learning!

*Sunday Master Class -
With Cyndi Dale*

**Miracles: Yours to Receive,
Yours to Deliver**

Our human state and perceptions make it hard to believe in, as well as, be open to “miracles”.

Yet, our clients often look to us to perform miracles and we get caught between knowing that they are possible and yet, we are only human and can't make promises. How do we open ourselves in such a way, and open to the light in the most beneficial way, to know we are delivering miracles every time we work? The KEY is understanding the definition of a miracle and our true nature.

In this workshop you will work through your doubts to become a channel of the miraculous. The connection to the heavenly light will enable you to be a conduit for miracles no matter your current state of emotions, including doubt or lack of self-confidence.

In this workshop discover:

- An approachable definition of a miracle so that you can best express your birthright of delivering and receiving miracles.

- Three experiential exercises designed to enable healers to activate miracles and deliver AMAZING transformations for yourself, your clients, and the world.
 - › **Personal Healing Streams of Grace** to initiate your enlightenment body.
 - › **Bending of Light** (from the heavenly universe to the fallen one) to produce remarkable transformations.
 - › **Group exercise** to formulate miracles of light for society and the world.
- How your body is truly designed so it will deliver the miraculous and the role of the chakras in producing a “**golden kundalini**” that cleanses the physical body and enables superpowers

Join us in this exclusive workshop so that you can best express your birthright of delivering and receiving miracles.

MORNING (Choose 1 morning and 1 afternoon)

Family Constellations: Resolving the Family Imprint and "Re-Rooting" The Family Tree (Half Day - Morning - 3 CE Hours)

With Jeanie Ballard, HTCP, CLC, CBD, RMT

Family/Systemic Constellations is a living science that explores the dynamics of family relationships connected to well-being and success in life. It is a three-dimensional group or individual process that has the power to shift generations of suffering and unhappiness. Bert Hellinger, the founder of this work, observed that many of us unconsciously "take on" destructive familial patterns as a way of "belonging" in our families.

This powerful healing modality focuses on the deeper roots of health and well-being by identifying the historical and habitual patterns stored in the history of our family's experiences and addressing the underlying patterns of family and relational systems integral to your life.

Working with what the body remembers and the knowledge that we are more than our individual experiences, clients are supported in identifying the root of a specific challenge and resolving it. This work is about freedom – opening to "re-root the family tree" in healthy and sustainable behaviors.

In this presentation, through Case Study and Self-Study, you will:

- Address frequent issues that are explored and

resolved in historical family constellations.

- Participate in Family/Systemic Constellation Work highlighting four ways that life force is diminished and strategies for resolution of challenges.
- Learn about the effect of Mirror Neurons.
- Gain a deeper sense of understanding of another person's journey as a result of being able to feel someone else's experience.

By illuminating the inner dynamics of oneself, along with one's family, business, organization, community, etc., you can gain insight into what is causing dysfunction within those systems and create a greater state of balance and wholeness.

HALF-DAY SESSIONS

AFTERNOON

(Choose 1 morning and 1 afternoon)

Translating Cyndi Dale Intuitive Healing and 13 Chakras to a HT Healing Practice (Half Day - Afternoon - 3 CE Hours)

With Amelia Vogler, HTCP/I

During the course of the weekend, Cyndi Dale offered new energy system models that include 13 chakras and fields and different intuitive methods for working with clients (and yourself). Because Healing Touch is typically done in a hands-on (or hands-off) model, with a client, it can be challenging to figure out how use intuitive healing techniques with a client during a session.

In this presentation...

- We will travel through the 10 step Healing Touch sequence identifying areas where you can take your practice to the next level.
- Start by "how" to use your intuition during an intake as an active healing method.

- Explore some major concerns that individuals bring into your session, such as ancestral issues, traumatic experiences, and limiting beliefs and how you can work with these during in the intake to begin to open the energy system for when it is time that they get onto the table.
- You'll look at how to use the Spiral Meditation and Chakra Connection using the 13 chakra system.
- Experience a deeper grounding using the 10th chakra and learn how to use Healing Streams of Grace through your hands in all of our Healing Touch techniques and discuss how this can be supportive for your client's healing.

Expand the impact of your HT sessions by discovering how to take Cyndi Dale's expanded energy system model and intuitive techniques and translate them into our current Healing Touch methods and protocol.

(Choose 1 morning and 1 afternoon)
